HEADTEACHER'S COMMENT

The Year 9 options process is the first time in your life in which you start to focus on your career as an adult. It is totally conceivable that in the 21st century, you may pursue more than one career, yet this is the time to think about the importance of qualifications and how they might open up opportunities in the years ahead.

The options booklet is a great start to help you on your way. It is important that you use this information, along with advice gleaned from your teachers, parents, older siblings and your wider family. It's also important to strike a balance between what you're good at and what you enjoy. Our KS4 core curriculum is both broad and demanding and tests a variety of skills. Make sure that the options you choose complement this; it's worth considering that a curriculum which challenges you in different ways will allow you to explore a wider range of skills, experiences and learning methods. It's also important that you are aware that the government considers the English Baccalaureate an important component of your education at GCSE. In order to achieve this, options taken in a modern foreign language and history or geography are essential.

As a grammar school, we believe that all of the options to you at Aston are valuable and that there are no pre-conceived suite of subjects which is more prestigious than the next. As ever, if you have questions about the suitability of validity of a subject, don't hesitate to ask.

Matt Brady Headteacher

KEY STAGE 4 CURRICULUM

IN YEARS 10 AND 11 THE CURRICULUM IS DESIGNED AROUND A CORE CURRICULUM MADE UP OF THE FOLLOWING SUBJECTS:

ENGLISH LANGUAGE*

ENGLISH LITERATURE*

MATHEMATICS*

BIOLOGY*

CHEMISTRY*

PHYSICS*

RELIGIOUS STUDIES*

PSHE

PE AND GAMES

IN THE SUBJECTS MARKED * ALL STUDENTS WILL STUDY FOR A GCSE QUALIFICATION.

IN ADDITION TO THE ABOVE SUBJECTS STUDENTS WILL STUDY FOR A GCSE QUALIFICATION IN 3 OF THE FOLLOWING SUBJECTS:

ART & DESIGN (FINE ART) OR (DIGITAL PHOTOGRAPHY)

COMPUTER SCIENCE

DESIGN & TECHNOLOGY

FRENCH

FOOD AND NUTRITION

GEOGRAPHY

GERMAN

HISTORY

MANDARIN

MUSIC

PHYSICAL EDUCATION

ASSESSMENT AT GCSE

All GCSEs are now linear in nature. This means that all of the written papers will be taken in the summer of Year 11. The examination time table begins in early May and continues until the last week of June.

GCSEs have undergone major changes in subject grading in recent years. All GCSEs have moved onto the grading system of 9 - 1. To make things more complicated, there is no direct correlation between the 9 - 1 and the more traditional $A^* - G$ grading system. Not only are there more grades, nine instead of eight, but they are also deliberately skewed towards the top end to allow greater differentiation between high-performing pupils and to meet the government's aim of more rigorous exams.

COURSEWORK / NON-EXAMINED ASSESSMENT

Only a small portion of GCSEs have retained coursework (now called Non-Examined Assessments, or NEAs). Details of these are provided by departments.

EXPECTATIONS AT GCSE

Undertaking a number of GCSE courses requires good organisation, keeping notes in good order and completing work on time are prerequisites to success in two years time. It is also essential that students catch up any work missed if he is away.

INTERNAL EXAMS

To prepare students for external GCSE exams, they will sit end of year internal exams at the end of Year 10 and around Christmas of Year 11. This will give them invaluable experience of revising for a set of exams in a small time period as well as familiarising them with the formal exam procedures. The results from these exam periods will be used to monitor the progress made by students.

MOVING INTO THE SIXTH FORM

Although this may seem a long way off at the moment, when choosing subjects students need to give some thought as to how GCSE choices may impact on A level choices. All A Levels now follow linear courses.

You should also be aware that the school has in place entry criteria for the Sixth Form, namely a grade 7 must be achieved in any subject you wish to take for A Level. A grade 8 in these subjects is usually indicative of the ability to access top grades at A Level.

SELECTING YOUR OPTIONS

Students make their option choices via SIMS student app. All students MUST choose three options choices. Please note that a student cannot pick both Fine Art and Photography or Design Technology and Food &Nutrition in their choices. Students will be given more information about this process via an assembly delivered by Mr Smart in school on Tuesday 29th March, 2022.

Students also have the ability to leave any comments about their choices but this is not compulsory. In addition, parents can e-mail Mr Smart if they wish to add any further comments to the option process. Please e-mail Mr Smart on d.smart@keaston.bham.sch.uk

Please note the deadline for choosing options is Friday 8th April, 2022

CHOOSING A SUBJECT

- O Unless you are certain about your future career path you should continue to follow a broad and balanced curriculum in Years 10 & 11.
- Students considering studying languages at university are strongly encouraged to study French, German and Mandarin
- O Your 'reserve' option must be a subject that you are prepared to study. It is not always possible to give all students their first three subject choices and when such instances occur parents will be informed.

These are some good reasons to choose a subject to study for GCSE:

- You like it or find it interesting.
- You are good at it.
- You need it or it is useful for your future career.
- You can develop new skills by doing it.
- You think you will do well in it.
- o It will give you satisfaction.
- Your teachers think it is a suitable choice for you.
- o It will combine well with other subjects and help your general education.
- You like the method of assessment and teaching.
- o It's a subject you would like to become good at.

Try not to pick GCSE subjects based on these reasons:

- Your friends are doing it.
- O You think you should do it; even if you do not want to.
- Your parents think it is a good idea but you do not.
- O You know someone who has done it and they say it is great.
- It's thought of as a 'cool' subject by most people.
- O You cannot think of anything else to choose.
- You think it will be easy.
- O It sounds good even though you have not found out about it.
- O You really like the teacher you have got now.
- You think it will impress people now or later on.

COMPULSORY SUBJECTS

EXAMINED SUBJECTS

Biology

Chemistry

English Language

English Literature

Mathematics

Physics

Religious Studies

NON-EXAMINED SUBJECTS

Personal, Social, Health and Citizenship Education (PSHE)

PE and Games

COURSE SPECIFICATION

GCSE | AQA

HEAD OF DEPARTMENT | MRS DHILLON

BIOLOGY

The aims of the course are: to build on the understanding of biological concepts first met during lower school Biology and Science lessons. During the course of the GCSE greater depth of treatment is given to topics covered and many new areas are also encountered. Students will be able to develop essential knowledge and understanding of different areas of the subject and how they relate to each other. They will have opportunities to develop and demonstrate a deep appreciation of the skills, knowledge and understanding of scientific methods and develop competence and confidence in a variety of practical, mathematical and problem solving skills. The course will also expect students to gain understand how society makes decisions about scientific issues and how the sciences contribute to the success of the economy and society.

The department would like to nurture their interest in and enthusiasm for the subject, including developing an interest in further study and careers associated with the subject.

COURSE CONTENT AND EXAMINATIONS

Paper	Content	Method of assessment
Paper 1	Topics 1 – 4: Cell biology; Organisation; Infection and response; and Bioenergetics.	Written exam: 1 hour 45 minutes Multiple choice, structured, closed short answer and open response 100 marks 50 % of GCSE
Paper 2	Topics 5 – 7: Homeostasis and response; Inheritance, variation and evolution; and Ecology.	Written exam: 1 hour 45 minutes Multiple choice, structured, closed short answer and open response 100 marks 50 % of GCSE

WHERE COULD THIS SUBJECT TAKE YOU?

Students who study biology are able to take the subject at A Level. Students who wish to pursue a career in a science based field, such as medicine, dentistry, physiotherapy, optometry, veterinary science and also in the rapidly expanding fields of biotechnology and genetic engineering.

ENRICHMENT OPPORTUNITIES:

Students may have opportunities to attend activities at Birmingham University.

COURSE SPECIFICATION

GCSE | AQA

HEAD OF DEPARTMENT | MR GIUBERTONI

CHEMISTRY

The Chemistry course aims to inspire and challenge students of all abilities. It looks at Chemistry in a range of contexts and looks to give real world hands on view of why Chemistry and the associated skills are important in the modern world. There is a focus on the application of mathematics to chemical calculations and in the development of practical skills.

COURSE CONTENT AND EXAMINATIONS

Paper	Content	Method of assessment
One	Topics 1–5: Atomic structure and the periodic	Written exam: 1 hour 45 minutes
	table; Bonding, structure, and the properties	100 marks
Multiple choice, structured, closed short answer and open response.	of matter; Quantitative chemistry, Chemical changes; and Energy changes.	50% of GCSE
Two	Topics 6–10: The rate and extent of chemical change; Organic chemistry; Chemical analysis,	Written exam: 1 hour 45 minutes 100 marks
Multiple choice, structured, closed short answer and open response.	Chemistry of the atmosphere; and Using resources.	50% of GCSE

WHERE COULD THIS SUBJECT TAKE YOU?

Chemistry is a key component of many fields of study. At A level it links well into pursing any science based qualification. At university Chemistry is key in many degree courses, those related to the medical profession and the chemical sciences and is highly thought of for entry into other subjects.

ENRICHMENT OPPORTUNITIES:

Various trips to providers around the area to explore Chemistry outside of the classroom. These include trips to master classes at universities and the option to partake in competitions run by the Royal Society of Chemistry.

ENGLISH

The overall aims of the English language and literature courses are to ensure both subjects are enjoyable, engaging and rewarding.

In the English language GCSE, students are taught to read fluently and write effectively. The course will enable students to demonstrate confidence in their control of Standard English as well as endow them with the ability to write grammatically correct sentences, employ linguistic techniques effectively and analyse texts perceptively.

In the English literature GCSE, students will encounter a wide range of stimulating texts by writers including Shakespeare, Robert Louis Stevenson, J. B. Priestley and poets as diverse as Wordsworth and John Agard; the ideas explored by these writers will challenge and stretch students as well as inculcate a life-long love of English literature.

In both courses, students will hone essay writing skills, including how to write effective introductions and conclusions as well as how to structure the main body of their responses to develop ideas and arguments successfully. Pupils will develop higher thinking skills such as how to analyse the effect of form, structure and language by discussing how meaning is created as well as the impact on the reader. Pupils will learn to synthesise ideas and evaluate the various methods employed by writers. Moreover, the department aims to instil resilience in students so that they can meet the demands of the rigorous curriculum and cultivate a growth mind-set so that students strive to improve and act on barriers to learning.

Paper	Content	Method of assessment
Language paper 1: Explorations in Creative Reading and Writing	Section A: Reading – one literature fiction text and four questions Section B: Writing – descriptive or narrative writing	1 hour 45 mins examination, 50% of GCSE
Language paper 2: Writers' Viewpoints and Perspectives	Section A: Reading – one non-fiction text and one literary non-fiction text Section B: Writing – writing to present a viewpoint	1 hour 45 mins examination, 50% of GCSE
Literature paper 1: Shakespeare and the 19th-century novel	Students study Macbeth and The Strange Case of Dr. Jekyll and Mr. Hyde.	Two essays, one on each text. The examination is 1 hour and 45 mins and is worth 40% of the overall GCSE.
Literature paper 2: Modern texts and poetry	Students study An Inspector Calls, a selection of poems from either the Love and Relationships or Power and Conflict sections of AQA's anthology and they also learn how to analyse unseen poems.	Three essays. 2 hour 15 mins examination. 60% of the overall GCSE.
Spoken language endorsement (formally, the speaking and listening assessment)	Students will give a speech on a topic of interest and participate in a debate with other candidate. A sample assessment of students' work will be recorded and sent to the examination board for moderation.	The spoken language endorsement will not contribute to the result of the GCSE English Language qualification. This endorsement will be reported as a separate grade (Pass, Merit, Distinction or Not Classified)

The ability to read thoughtfully and analytically as well as to write fluently and speak confidently are skills required in all subject areas and all walks of life. A good GCSE in English language and literature will indicate a student's ability to express themselves effectively which makes them an ideal candidate for A level courses. Universities will also look favourably on candidates attaining high grades in English language and literature because students with these qualifications will possess the qualities to tackle the rigours of degree level. Moreover, employers in all sectors will be interested in people who have demonstrated the communication skills necessary to gain top GCSEs in English.

ENRICHMENT OPPORTUNITIES:

The English department offers a range of enrichment opportunities such as participating in debating competitions, creative writing workshops, book clubs as well as attending trips to events such as Poetry Live and theatre performances in Stratford-Upon-Avon. Students also have the opportunity to earn achievement points by taking on the reading challenge to review the department's recommended books.

MATHEMATICS

The aims of the course are to

- O Develop fluent knowledge, skills and understanding of mathematical methods and concepts.
- O Acquire, select and apply mathematical techniques to solve problems.
- O Reason mathematically, make deductions and inferences and draw conclusions.
- Comprehend, interpret and communicate mathematical information in a variety of forms appropriate to the information and context.

During this course you will learn how to solve problems and to break tasks down into steps of working, enabling you to think logically. A greater emphasis will be given to solving problems in familiar and unfamiliar context in GCSE questions. You must sit three exam papers at the higher tier. Each paper will be 1½ hours long and will be equally weighted. One paper will be non-calculator whilst the other two will be calculator papers, each will be of similar difficulty. There will be no coursework.

COURSE CONTENT AND EXAMINATIONS

Paper	Content	Method of assessment
Non-calculator	All topics studied from Y7-Y11 inclusive	Written examination. 90 minutes. 80 marks, equal weighting.
Calculator 1	All topics studied from Y7-Y11 inclusive	Written examination. 90 minutes. 80 marks, equal weighting.
Calculator 2	All topics studied from Y7-Y11 inclusive	Written examination. 90 minutes. 80 marks, equal weighting.

WHERE COULD THIS SUBJECT TAKE YOU?

Mathematics degree

Support subject for most other degrees (eg engineering,

medicine, physics, geography etc)

Finance/accountancy

Actuarial work

Statistician

Risk management

Teaching

Sciences

ENRICHMENT OPPORTUNITIES:

Broader aspects of study are an essential feature of Mathematics at Aston and students are encouraged to participate in a range of activities such as involvement in UKMT Challenges and other competitions, Mathematical Activity Days in School and visits to 'Popular' Mathematics lectures at the University and elsewhere.

PHYSICS

The GCSE Physics course involves investigating how the natural world works and are designed to engage students' interest at every level by providing relevant in inspiring academic content, practical opportunities to undertake scientific enquiry and learn about the scientific process. Students will have the opportunity to develop the following skills:

- O Knowledge and understanding to pose, define and solve scientific questions and problems.
- O An understanding of the continuously evolving relationship between science and society
- O Communication, literacy and numeracy skills in a scientific context
- O Planning skills, including the management of risk Investigative skills, including the collection selecting, processing and analysing of secondary data to provide evidence.

The content is taught to a higher level and bridges the gap between GCSE and A level, extending students understanding of the scientific world and challenging students to make synoptic links between topics.

Lessons are a mixture of practical work to develop understanding of the topic areas, developing skills to question and investigate scientific principles and ideas, literacy activities to demonstrate student understanding and engaging activities to support learning and progress.

COURSE CONTENT AND EXAMINATIONS

Paper	Content	Method of assessment
Paper 1	Topics 1-4: Energy; Electricity; Particle model of matter; and Atomic structure.	Written exam: 1 hour 45 minutes 100 marks 50% of GCSE
Paper 2	Topics 5-8: Forces; Waves; Magnetism and electromagnetism; and Space physics.	Written exam: 1 hour 45 minutes 100 marks

WHERE COULD THIS SUBJECT TAKE YOU?

AQA GCSE Physics (Higher Tier) provide opportunities for progression. It is rigorous and provides students with a good grounding for taking Physics further in the Sixth Form. There is a good balance between practical work and theory in this course, and students can apply the transferable skills in other disciplines.

ENRICHMENT OPPORTUNITIES:

In addition to the regular course of studies, a number of students choose to become involved in extra-curricular activities such as mentoring younger students within the school, Mastery and Leadership awards and visiting local and national universities for talks and seminars.

The department also encourages participation in the British Physics Olympiad and a number of students attend extra classes to help prepare for this event; these classes also prove popular with those students looking to apply to top universities for their undergraduate studies.

RELIGIOUS STUDIES

The aims of the course are to ask big philosophical questions about religion and life (what gives life its value? How might this impact our decisions about medical ethics?); religion, crime and punishment should be abolished? Is the death penality wrong? Religion, human rights and social justice (do we currently live in a just society? Are there any limits to freedom of expression or belief?); and revelation and the existence of God (if revelation is to be believed, what do we know about God? And if there are any reasons for doubting revelation, does this mean such a God cannot exist?); as well as learning in-depth about two major world religions: Christianity and Islam.

COURSE CONTENT AND EXAMINATIONS

Paper	Content	Method of assessment
Component 1	Christianity Beliefs, Teachings and Practices. Islam Beliefs, Teachings and practices.	50% 1hr 45min written exam
Component 2	The Existence of God and Revelation Religion and Life Human Rights and Social Justice	50% 1hr 45min written exam

WHERE COULD THIS SUBJECT TAKE YOU?

While those who enjoy the the course are encouraged to consider A-level. Beyond the specific subject knowledge of Christianity and Islam, Religious Studies gives you skills not only in detailed explanation of complex ideas, but in critical analysis and evaluation of ideas and arguments, as well as close textual analysis. Such skills are transferrable to a range of subjects and future degrees/careers from law, to engineering, to computer science, to politics, to economics, to mathematics, to medicine.

ENRICHMENT OPPORTUNITIES:

Each year the seven best philosophers in each form in year 10 are entered into our annual House Philosophy competition and Philosophy Morning. In the past this has been run with guests from Warwick University, York University and the Panpsycast Podcast. Feedback from students involved has been universally positive each year. In Year11, we participate in the inter-school Philosophy competition between King Edwards School and we also participated in 2022 UK Philosothon.

As well as encouraging wider reading through our reading lists and study packs, we also try to get Religious Studies students involved in as many Religious Studies/Philosophy conferences/ guest speakers as possible. Past visits have included Oxford University and Birmingham University.

OPTIONAL SUBJECTS

You need to select three of the following subjects to study at GCSE level:

Art & Design (Fine Art) or (Digital Photography)

Computer Science

Design & Technology

Food preparation and Nutrition

French

Geography

German

History

Mandarin

Music

Physical Education

 $\begin{array}{c} \text{Course specification} \\ \text{GCSE} \mid \underline{\text{OCR}} \\ \text{Head of department} \mid \text{Miss moore} \end{array}$

ART & DESIGN

The aims of the course are: ART

- O To enable pupils to express themselves through various creative mediums.
- O To look at the work of others to inform your own artistic style.

PHOTOGRAPHY

- O To enable pupils to express themselves through a digital platform.
- O To master photoshop and have some core experience within the darkroom.

Art & Photography will also develop personal skills such as self-management, time management, organisation, presentation skills, critical analysis and enabling pupils to question what they see and develop as a learner beyond the subject itself.

The GCSE would suit students who have an aptitude towards art or photography and have achieved highly over their KS3 curriculum within all areas. It also suits students who can work independently and investigate their own source imagery. Photography would suit pupils who are very artistic, have achieved highly within the subject but core drawing is the weakest area. In art you will explore many materials and processes especially drawing and painting. You will be taught how to manipulate acrylics and be confident to work on a large scale. Photoshop is used within the photography course to manipulate images and as a spring board to develop in-depth ideas in preparation for final art work.

Component	Content
1 Portfolio	Students produce a portfolio of practical work showing their personal response to a set starting point, brief, scenario or stimulus. The portfolio may be presented in appropriate formats for the specification title they are following and chosen area of study, including sketchbooks, digital presentations, mounted sheets, maquettes, prototypes, animated work, scale models or illustrated written work.
	The portfolio must provide evidence that the student has met all four assessment objectives.
	120 marks - 60%
2 Externally set task	Students respond to one of five themes, each with a range of written and visual starting points and stimuli. Students research, plan and develop ideas for their response to the option they have chosen, which they must then realise within the ten-hour supervised time period.
	80 marks - 10 hours - 40%

A level Art/Photography Any A levels that are creative such as DT/ceramics/ Foundation course in art

Some jobs you could move into include:

- Advertising
- Architecture
- Art therapist
- Art valuer
- Automotive design
- Conservator
- Court room artist
- Creative director
- Fashion
- o Film
- o Game designer
- Illustrator
- Journalism
- Landscape architect
- Medical photographer
- Print maker
- Teaching

ENRICHMENT OPPORTUNITIES:

- Dark room
- Lunch club each week

COMPUTER SCIENCE

The aims of the course are for students to:

- o develop their understanding of current and emerging technologies, understanding of how they work and apply this knowledge and understanding in a range of contexts
- o acquire and apply a knowledge, technical skills and an understanding of the use of algorithms in computer programs to solve problems using programming
- O use their knowledge and understanding of computer technology to become independent, discerning and informed users of IT and develop their skills to work collaboratively develop computer programs to solve problems to, the use of computer technology in society.
- o evaluate the effectiveness of computer programs/solutions and the impact of, and issues related

The GCSE would suit students who...

- o are interested in how computers are used for solving problems.
- want to develop or improve a fundamental way of thinking and problem solving, which is called "Computational Thinking".
- o like challenge and want to study a logical and a creative subject at the same time.
- o are interested in developing an understanding of the applications and fundamental principles of computer science.

Paper	Content	Method of assessment
Unit 01-	Computer systems	Written Paper
Computer Systems	- Systems Architecture - Memory - Storage - Wired and	1hr 30 mins
	wireless networks - Network topologies, protocols and	80 marks
	layers - System security - System software - Ethical, legal,	50% of the qualification
	cultural and environmental concerns	
Unit 02 –	Computational thinking, algorithms	Written Paper
Computational	and programming	1hr 30 mins
thinking,	- Algorithms - Programming techniques - Producing	80 marks
algorithms and	robust programs - Computational logic - Translators and	50% of the qualification
programming	facilities of languages - Data representation	

This course gives students a real, in-depth understanding of how Computer technology works and provides excellent preparation for higher study and employment in Computer Science. Studying Computing helps in developing problem solving skills such as the ability to think logically, algorithmically and recursively which are considered very useful skills to have if you wish to pursue a career in Programming, Software engineering, Data analysis, Gaming industry, Mathematics, Science, Economics, Art and Design & Technology field.

ENRICHMENT OPPORTUNITIES:

Computer Science lectures at Oxford University . Visit to National Museum of Computing and Bletchley Park. Visit to Jaguar Land Rover Engine management centre, Wolverhampton.

DESIGN & TECHNOLOGY

The aims of the course are:

- O To give pupils a practical set of skills working with a variety of materials.
- O To build pupils knowledge of the Iterative Design process, using design and modelling to explore their ideas.
- O To develop pupils knowledge of Design and the importance of its role within society.
- O To build pupil's confidence and ability to take creative risks.
- O To teach pupils how to use industry standard CADCAM effectively to assist in the development of their ideas.
- O To prepare pupils for a possible career in Design, Engineering or the Creative sector

The GCSE would suit students who

- O Have an aptitude in Design and Technology already and enjoy the subject.
- O Have enjoyed the pace of Year 9's Iterative Design project and are keen to push themselves further.
- Are confident working independently, solving problems and looking for information themselves.

Paper	Content	Method of assessment
Paper 1	Core technical principles Specialist technical principles Designing and making principles	Written exam: 2 hours 100 marks 50% of GCSE
Non-exam assessment (NEA)	Practical application of: Core technical principles Specialist technical principles Designing and making principles Substantial design and make task Assessment criteria: Identifying and investigating design possibilities Producing a design brief and specification Generating design ideas Developing design ideas Realising design ideas Analysing & evaluating	Non-exam assessment (NEA): 30–35 hours approx 100 marks 50% of GCSE

A GCSE in Design and Technology will provide students with more than just a route into Product Design or Engineering. The subject instils numerous transferable skills through the various challenges that pupils will face and overcome and will make every pupil a desirable candidate to potential future employers. In particular, the ability to communicate well, think critically and innovate are all skills that modern employers are looking for.

GCSE Design and Technology does prepare you for a career in Design or Engineering, and opens up pathways that could take you to A-Levels and a University Degree or could help you to find an apprenticeship, gaining 'on-the-job' experience. There are a wealth of career routes in the Design and Engineering sectors, lots of information about these routes can be found on the noticeboard opposite A3 (or come and have a chat with Mr Hodgkinson).

ENRICHMENT OPPORTUNITIES:

- Opportunity to use CADCAM in lunchtimes
- O Various competitions entered throughout the year
- O Specific DT enrichment course
- O Jaguar Land Rover trip (Yr11)

FRENCH

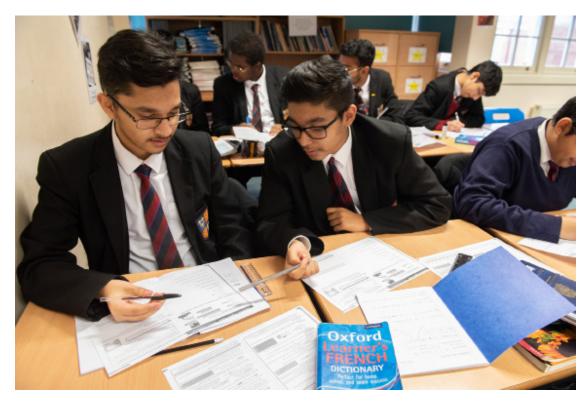

The aims of the course are:

- To develop students' skill in communicating confidently across a full range of topics both in terms of the spoken and the written word.
- O To develop students' listening and reading comprehension across a range of topic areas.
- This course also includes a focus on skills such as translation, understanding authentic and literary texts and spontaneous speaking.

This is an ideal option for students who might have an interest in a future career in banking, law, accounting, engineering, advertising, finance, teaching, interpreting and in many other sectors. We live in s global world and graduates who have some knowledge of an additional language are highly rated.

This GCSE covers four main skills: listening, reading, speaking and writing. Each skill accounts for 25% of the final exam. The range of skills tested means that all types of learners have an opportunity to succeed

Paper	Content	Method of assessment
Speaking	Theme 1 - Identity and Culture Theme 2 - Local,national, international,and global areas of interest Theme 3 - Current and future study and employment	25% final exam
Listening/Reading	Theme 1 - Identity and Culture Theme 2 - Local,national, international,and global areas of interest Theme 3 - Current and future study and employment	25% final exam + 25% final exam
Writing	Theme 1 - Identity and Culture Theme 2 - Local,national, international,and global areas of interest Theme 3 - Current and future study and employment	25% final exam

Previous Aston students have gone on to study French with such subjects as Engineering, Maths, Business, Linguistics, Law, Accounting amongst others. In a global economy, graduates who can also offer a foreign language are always in demand.

ENRICHMENT OPPORTUNITIES:

- O Paris trip.
- O Speakers from local universities are invited to talk about careers with languages.
- O Y12/Y13 Presentations on studying languages at A level.

FOOD PREPARATON AND NUTRITION

The aims of the course are:

To prepare pupils for possible careers in dietetics, nutrition, health, food science and hospitality

- · To equip pupils with a diverse skill set using a range of ingredients
- · To develop pupils' understandings of health, nutrition, personal needs and how these impact our daily lives
- · To enable students to undertake food science experiments, better understanding the properties and functions of ingredients
- · To empower pupils to make good food choices by equipping them with an in-depth knowledge of nutrition, health and food provenance

This GCSE would suit students who:

- · Have a genuine interest in food, food science and nutritional wellbeing and the theory behind these topics
- · Enjoy challenges and working both independently as well as in a team

Paper	Content	Method of assessment
Paper 1: Food preparation	Food nutrition and health	Written exam: 1 hour 45 minutes,
and nutrition	Food science	100 marks
	Food safety	50% of GCSE
	Food choice	
	Food provenance	
Non-examined assessment	Task 1: Food investigation (30 marks)	Task 1: Report (1,500 – 2,000 words) including
	Task 2: Food preparation assessment (70 marks)	photographic evidence of practical investigation
(NEA)		Task 2: Portfolio of evidence including
		photographic evidence of three final dishes

Where could this subject take you?

A GCSE in Food Preparation and Nutrition will empower students with the theoretical and practical knowledge to pursue further studies in the fields of nutrition, health, dietetics and food science. Opportunities to study the subject at A-level or through vocational routes with other educational providers are available, and students will be well-prepared to explore careers in health, nutrition, product development and hospitality.

GEOGRAPHY

The GCSE Geography programme of study at Aston is designed to excite our students' minds, challenge perception and stimulate their investigative and analytical skills.

Through the study of geography students will travel the world from the classroom, exploring examples in the UK, higher income countries, emerging economies and lower income countries. Topics of study include climate change, poverty, deprivation, global shifts in economic power and the challenge of sustainable resource use. Students are also encouraged to understand their role in society, by considering different viewpoints, values and attitudes. A residential trip to Shropshire, as well as day trips, will enhance the learning that takes place in school.

GCSE Geography would suit students who wish to learn more about the world we live in today. Geography will provide you with knowledge and transferable skills that will reward you personally and advance you professionally. No doors are closed in Geography, making it the ideal subject to choose if you wish to develop essential skills such as problem solving, decision making, synthesising ideas, identifying issues and communicating findings.

Paper	Content	Method of assessment
Our Natural World	Global Hazards	Written exam: 1 hour 15 minutes.
	Changing Climate	70 marks
	Distinctive Landscapes	35% of GCSE.
	Sustaining Ecosystems	
People and Society	Urban Futures	Written exam: 1 hour 15 minutes.
	Dynamic Development	70 marks
	UK in the 21st Century	35% of GCSE.
	Resource Reliance	
Geographical Exploration	Synoptic assessment of topics linked to both	Written exam: 1 hour 30 minutes
Geographical Exploration	human and physical Geography. Geographical	60 marks
	skills.	30% of GCSE
	Decision Making Exercise	30 /0 01 GCOL
	Decision Making Exercise	

Geography closes no doors. Due to the many skills involved, it sits perfectly alongside almost every subject at GCSE and A-level. Of course, your studies and enjoyment of the subject could lead to Geography at degree level and beyond.

For future careers, Geography is great for any kind of career that involves the environment, planning, or collecting and interpreting data. Popular careers for people with geography qualifications include: town or transport planning, surveying, conservation, sustainability, waste and water management, environmental planning, tourism, and weather forecasting.

The army, police, government, research organisations, law and business world also significantly value the practical research skills that geographers develop.

As geographers learn about human and population development, geography can be highly useful for jobs in charity and international relations too.

ENRICHMENT OPPORTUNITIES:

As part of the course, we will be undertaking a minimum of 2 days of fieldwork. We also hope to offer additional a non-compulsory residential visit.

 $\label{eq:course specification} Course \ specification \\ GCSE \mid AQA \\ HEAD \ OF \ DEPARTMENT \mid MRS \ \ LAVENTINE-LEE$

GERMAN

The aims of the course are:

- O To consolidate and build upon German grammar learned over years 7-9
- O To better understand German culture, traditions and society
- O To be able to write and speak accurately from memory across a range of topics
- O To be able to recognise language across a range of topics in listening & reading

GCSE German would suit students who...

- O Have a flair for languages
- O Enjoy learning about other cultures
- Enjoy problem-solving
- O Want to enjoy a broad curriculum
- o are prepared to work hard to stay 'in touch' with German by listening to German music, watching German films etc
- O Planning on studying at a Russell Group University, German is a facilitating subject and is part of English Baccalaureate, which is highly valued by the top 24 leading universities.

Paper	Content	Method of assessment
Listening exam 25%	THEME 1: IDENTITY AND CULTURE	45 minutes
Reading exam 25%		1 hour
Writing exam 25%	THEME 2: LOCAL, NATIONAL, INTERNATIONAL	1 hour 20 minutes
Speaking exam 25%	AND GLOBAL AREAS OF INTEREST	12-15 minutes (conducted internally by your
		German teacher, usually a week or two before Year
	Theme 3: Current and future study and	11 study leave begins)
	EMPLOYMENT	

"Students able to speak a second language have better listening skills, sharper memories, are more creative, are better at solving complex problems, and exhibit greater cognitive flexibility."

(National Educational Association, 8th Feb 2019)

With 120 million native speakers, German is Europe's most widely spoken mother tongue. Add to that that the fact that it is the second most spoken second language in Europe (behind English), it is important that we study German. It is the language of academia, of commerce, of science and of invention. Unfortunately, there is a declining number of students opting to study this language across the UK, which means that you will be in high-demand in the workplace, if you are proficient in the language.

One of the reasons why German has such a high standing in the science community is the fact that Germany's universities have an excellent international reputation and are free for everyone(even non-Germans). In the year 2011, the country was the fourth most popular destination for students from abroad with more than a quarter of a million foreigners being enrolled in German schools. What's more, the German system for higher education boasts a number of universities with a very low or non-existent tuition fee. You could study there for free!

Speakers of foreign languages are always in high demand, across the world and in all different sectors, so there really is no limit as to where proficiency in German could take you! According to <u>Studying-in-Germany</u> website, German is the most widely taught third language across the world.

ENRICHMENT OPPORTUNITIES:

- O KS4 visit to Germany
- Opportunity to mentor/support KS3 students through a "Lernen durch Lehren" program (learning through teaching)

HISTORY

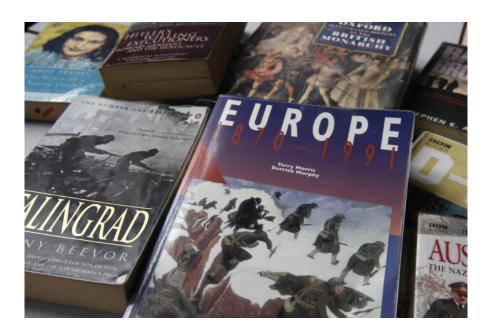

History at Aston follows the AQA GCSE History Syllabus, which enables students to study different aspects of the past, so they can engage with key issues such as conflict, what drives change and how the past influences the present.

Students who choose to study History need to be very active learners as there is a lot of discussion that takes place in lessons. You should also be prepared for a considerable amount of writing, as many of the exam questions are extended essays and answers.

Paper	Content	Method of assessment
Paper 1: Understanding the modern world	Section A – Period study: Germany, 1890–1945: Democracy and dictatorship Section B - Wider world depth studies - Conflict and tension, 1918–1939	Written exam: 2 hours 84 marks (including 4 marks for spelling, punctuation and grammar 50% of GCSE
Paper 2: Shaping the nation	Section A - Thematic studies - Britain: Health and the people: c1000 to the present day. Section B - British depth studies - Norman England, c1066–c1100.	Written exam: 2 hours 84 marks (including 4 marks for spelling, punctuation and grammar 50% of GCSE

History is a subject that complements a wide range of other choices, and is considered invaluable in gaining access to many professions. The ability to work and research independently and present a closely detailed argument are skills valued in all professional walks of life; many History students develop careers in law, journalism, broadcasting, politics, social work and public services.

ENRICHMENT OPPORTUNITIES:

The department runs a History day in Year 11 to support students in their understanding of Unit 2. This includes a visiting speaker and a session on the environment study.

COURSE SPECIFICATION

HEAD OF DEPARTMENT | MRS LIU

MANDARIN

The aims of the course are:

- To develop their ability to communicate confidently and coherently with native speakers in speech and writing.
- To express and develop thoughts and ideas spontaneously and fluently.
- To deepen their knowledge about how language works and enrich their vocabulary in order for them to increase their independent use and understanding of extended language in a wide range of contexts
- O To develop awareness and understanding of the culture and identity of the countries and communities where the language is spoken
- To make appropriate links to other areas of the curriculum to enable bilingual and deeper learning, where the language may become a medium for constructing and applying knowledge To develop language-learning skills both for immediate use and to prepare them for further language study and use in school, higher education or employment.

The GCSE Mandarin course is designed to enable students of all abilities to develop their Chinese (Mandarin) language skills to their full potential, equipping them with the knowledge to communicate in a variety of contexts with confidence.

This is an ideal option for students who have an interest in a future career in banking, law, accounting, engineering, advertising, finance, teaching, interpreting and in many other sectors. We live in a global world and graduates who have knowledge of an additional language are highly rated.

This GCSE covers four main skills: listening, reading, speaking and writing. Each skill accounts for 25% of the final exam. The range of skills tested means that all types of learners have an opportunity to succeed.

COURSE CONTENT AND EXAMINATIONS

Paper	Content	Method of assessment
Listening/reading exam	THEME 1: IDENTITY AND CULTURE	Written exam 25%+25% of GCSE
Writing exam		Written exam 25% of GCSE
Speaking exam	THEME 2: LOCAL, NATIONAL, INTERNATIONAL AND GLOBAL AREAS OF INTEREST	Conducted internally by your teacher 25% of GCSE
	Theme 3: Current and future study and employment	

PLEASE NOTE:

MANDARIN GCSE IS ONLY AVAILABLE TO STUDENTS WHO HAVE STUDIED THE LANGUAGE IN YEARS 8 AND 9.

China has a booming economy and is a global superpower. Through opening itself up to the world, China has welcomed foreign investment and economic cooperation. As such, there is a massive demand for people who are able to bridge the gap between this new China and the wider world. As Chinese becomes the dominant language and cultural force for the 21st century, learning Mandarin provides a unique and exciting opportunity for our students who will have a competitive advantage in the world of business. We want our students to understand the value of these communication skills in the job market place and the importance of working hard to achieve results.

ENRICHMENT OPPORTUNITIES:

- O Chinese restaurant visit.
- O Chinese culture visit to London.
- O Competitions with pupils from other Swire Chinese Language centres in the UK.
- O Lunch club every week.

MUSIC

Music at Aston follows the Eduquas GCSE Music syllabus which enables students to explore three core areas of Performing, Composing and Listening. Students who choose to study music must already have a passion for performing on either an instrument or voice. Performing and Composing make up 60% of a music GCSE in coursework, leaving one Listening paper worth 40% of your final mark.

GCSE Music would suit students who

- O Already play a musical instrument or confidently sings and have the commitment to reach grade 3 in year 11 to achieve maximum performance marks.
- O Play in an ensemble either in school or out of school
- O Who enjoy composition and want to explore this further
- O Are prepared to work hard and listen to a wide range of musical styles and develop a much deeper understanding

COURSE CONTENT AND EXAMINATIONS

Paper	Content	Method of assessment
Component 1: Performing Total duration of performances: 4-6 minutes	A minimum of two pieces, one of which must be an ensemble performance of at least one minute duration. The other piece(s) may be either solo and/or ensemble.	Non-exam assessment: internally assessed, externally moderated 30% of qualification
Component 2: Composing Total duration of compositions: 3-6 minutes	Two compositions, one of which must be in response to a brief set by WJEC. The second composition is a free composition for which learners set their own brief.	Non-exam assessment: internally assessed, externally moderated 30% of qualification
Component 3: Appraising	This component is assessed via a listening examination based on learning from four areas of study. 1: Musical Forms and Devices 2: Music for Ensemble 3: Film Music 4: Popular Music	Written examination: 1 hour 15 minutes 40% of qualification

Where could this subject take you?

Studying music has the ability to enhance all learning skills as it is the only subject where you use all parts of the brain. It develops communication skills, creativity, teamwork, discipline, cultural awareness, respect for others, and self esteem through personal accomplishment. It is also a powerful way to relieve stress, lift our mood and relax. At GCSE level it is more important to choose subjects you enjoy and excel at. If you are aiming to apply to study at a top university you need to think beyond academic achievement, you will need to demonstrate your commitment to a whole range of extra-curricular activities and life-enhancing skills. So, this subject can take you anywhere you aspire to!

OENRICHMENT OPPORTUNITIES:

The music department is a very lively place to be with a whole range of extra-curricular activities in Key Stage 4 & 5 to choose from.

- · Orchestra
- · Jazz Band
- · String Ensemble
- · Guitar Ensemble
- · Senior choir
- · Percussion Ensemble
- · Brass Ensemble

In addition to the above, we have 16 visiting instrumental teachers who teach all instruments as well as offering specialist chamber music coaching. There are further opportunities for students to form their own ensembles, small jazz groups and rock bands. And finally, as part of the course you have your instrumental lessons subsidised by the school.

PHYSICAL EDUCATION

GCSE PE Is a broad and varied course that involves; more human anatomy than Biology! Introduces Economics, Psychology and Social Science as new topics of study. It creates understanding and appreciation of their own performance and the performance of others. It develops theoretical knowledge of sport, while improving and underpinning practical performance.

GCSE PE would suit students who enjoy sport and physical activity. Students who realise it is a theory course with practical elements and not just an opportunity to play more sport. Students who wish to challenge themselves in competitive environments. Students who wish to develop a deeper understanding of how their body works, how the body responds to physical activity. Students should be active learners who wish to take their knowledge to the next level.

The entry requiorements for PE GCSE are:

- O At least 1 sport graded at or above a grade 7 in year 8 or 9.
- o 2 additional sports that are graded 6 or above
- O Represented the school at sport
- Or play sport regularly outside of school

Paper	Content	Method of assessment
1 - The human body and	Applied anatomy and physiology	Written exam, 1hr 15 mins

and sport.	Use of data	
NEA - Practical	Practical performance in three different	Assessed by teachers
performance in physical	physical activities in the role of the player/	Moderated by AQA
activity and sport	performer (one team, one individual and a	100 marks
, 1	third in either a team or individual activity)	40%
	Analaysis and evaluation of performance to	
	bring about improvement in one activity.	

The breadth of the course covers material which is expanded further at A-Level - Links really strongly with several A level courses such as biology (anatomy and physiology) Physics (biomechanics) Psychology (sports psychology), to name a few.

Universities appreciate GCSE PE as it shows that a student has a breadth of knowledge has also played sport to a high level therefore it shows the ability to commit to teams and long-term goals. As well as an indicator of them having developed the ability in the "softer skills" such as communication which are required to be successful.

There are clear links to numerous future careers such as:

- Sport science
- Physiotherapy
- Sports therapy
- Fitness industry
- Sports management & development
- Teaching
- Coaching

As well as less clear links to fields in medicine (anatomy and physiology) and law (ability to evaluate, question and debate). It links to lots of other careers that you would not realise at first glance. Key skills such as leadership, teamwork and communication make the course relevant to every future career. communication.

ENRICHMENT OPPORTUNITIES:

- O Lots of opportunities to play sport within school in their Games programme
- Opportunities for leadership experience through the sports partnership links.
- O Annual year 10 visit to a local university to access their sports facilities.
